But the important thing to Washingtonians is that through the many economies that our piano club affords they save nearly one hundred dollars-or, to be exact, eighty-seven dollars—all of which has been made possible by adopting the most economical selling methods and a willingness to make a smaller profit than we usually make in order to quickly fill up the club and close the deal.

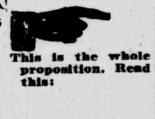

If you have the slightest idea of purchasing a piano this year, you are false to your own interests if you don't at once investigate this extraordinary opportunity.

If you cannot come to the store, simply send us your check or a 5-dollar bill and say you "want to join the club." If the piano is not satisfactory after it has been selected and tried for 30 days, we will give you your money back.

## Our Club Piano Has a Tried and Tested Value

THERE is nothing of the "mushroom" character to the 500 pianos we are distributing through our big Frederick piano club. There are over 56 thousand of these pianos in

American homes. As we have mentioned before, they have been very largely sold in this section. There are hundreds of them today in homes in this city. In Philadelphia alone, it is estimated, there are over 3 thousand. In New Orleans and vicinity one of the country's prominent piano dealers has sold an average of 2 hundred and 50 a year for over 10 years -and so on and so on. We could go on and mention dozens of dealers and dozens of communities that have figured in the distribution of this great piano-56 thousand of them-and each and all with equal success.
